

VDO DTCO® 1381 (Release 1.4) the ‘One Minute Rule’ Digital Tachograph with Graphical Printouts

The launch of the DTCO® 1381 (Release 1.4), paves the way for fleet operators to enhance their fleet efficiency and increase productivity. The new “1 Minute Rule” which calculates driving time according to EU Regulation 1266/2009, has been integrated into the new Digital Tachograph, so drivers can optimise their driving time during the working day. User friendly graphical printouts make evaluating data easier and faster and include detailed Speed and 7 day Driver Card mode activity profiles.

The new Digital Tachograph offers the following features:

- Implementation of the latest requirements of EU Regulation 1266/2009 including the new “1 minute rule”.
- Fast Download function saving considerable time when downloading data.
- User friendly graphical printouts make evaluating data easier and faster, including detailed speed and 7 day Driver Card mode activity profiles.
- Simplified process for entering Manual Entries (in local time)
- Interface for downloading Driver Card and Digital Tachograph data remotely, via GPRS or WLAN
- Early warnings given when a Driver Card is about to expire and when a Periodic Inspection is due.
- Additional data such as odometer readings when the vehicle becomes stationary and any status changes
- Storage of 168 hours of detailed speed data at a resolution of 1 Hz
